FUN FACT!
Help from microorganisms called protozoa make it possible for termites to digest wood.

FUN FACT!
Colonies can include up to 200,000 termites!

FUN FACT!
Termite colonies start way below ground, and travel up toward your house through special mud tunnels. Very active in Spring and Fall, termites feed on the cellulose found in wood... which makes your house a pretty tasty treat!

FUN FACT!
Queen termites can live for up to 25 years and produce up to 60,000 eggs.
